# OUR FIVE-STAR APPROACH TO TOOL KITTING

---

## ORGANIZATION

Tons of options for organizing tools: bags, shadow boards, tool silhouette decals, foam inserts for portable cases, custom foam layouts for tool box drawers, and more. When you're highly organized, you're highly productive.

## TOOL MANAGEMENT

Management follows organization. Whether you require simple visual management, or a program to meet FOD and FME requirements, we can tailor a management program for virtually any need with our Level 5 Tool Control System offering.

## SOURCING AND INTEGRATION

Need a tool that requires additional sourcing beyond our standard offerings? No problem. We can do the sourcing for you, and integrate the components into your kit.

## TOOL IDENTIFICATION

At Snap-on®, we have in-house laser tool engraving capabilities to match your identification system – whether you're looking for etching on a specific kit, or serially marked tools.

## ON-SITE TOOL MANAGEMENT

Sometimes you need someone to actually go on-site, check inventories, manage updates, and handle replacements. Snap-on® is ready to assist you with all your tool needs.

## LOOKING FOR TOOL KITTING?

Contact your Account Manager  
or call 1.877.740.1900 for details.

# TOOL CONTROL

# TOOL CONTROL THAT PUTS YOU IN COMMAND

For technicians, lost tools can kill a productive workday with wasted time. That's why Snap-on has kept technicians organized and productive since 1920. Now, over 100 years later, Snap-on offers the most advanced form of tool control in the industry: Level 5 Tool Control System. From seamlessly integrated access control to fully automated systems that automatically monitor who has which tools and where they're working, the Level 5 Tool Control System improves every aspect of tool management. And it works with your crew, at the speed of work, to decrease downtime and improve productivity. That way everyone can concentrate on what matters most—the job at hand.

## LEVEL 5 TOOL CONTROL SYSTEM IS TILTING THE PLAYING FIELD.

### ORGANIZATION

The more organized you are, the easier it is to get the job done right. Starting with a complete tool audit conducted by a Snap-on® Solutioneer, we'll help you determine the level of tool control you need and design a specialized tool set with your specific applications in mind.

### VISIBILITY

Finding the right tool for the job can take time—even more so if they're hard to see. Our visibility solutions decrease the time to know the tool is missing and find tools you need. Our selection of high-visibility tool handles, custom color foam inserts, toolbox organizers, and pegboards don't just raise the visibility of your tools, they raise the productivity of your team.

### ACCESS CONTROL

Don't get locked in to using keys that can be lost or shared. Our tool storage units have Keyless Access Control, which means your teams have access to just the tools they need. You can configure the tool control to work with HID proximity badges or PINs. And with our proprietary software, you can control access from one system, or from your network. With our Access Control, you can keep productivity up while keeping unauthorized users out.

### ASSET MANAGEMENT

What if you could keep track of your key assets all from one place? With Level 5 software system, you can. It provides full reports on everything you want to keep tabs on. It will even update you when a tool needs to be restocked or ordered. Our solution is designed to preserve your assets and your sanity.

### AUTOMATION

When you minimize human error, you minimize FOD and FME, and maximize productivity. Our Automated Tool Control handles all tool control and tracking automatically. Whether it's by digitally scanning every drawer or by using RFID tags to track large equipment, our systems notice which tools have been removed or added, and track each tool by part number and user. Keep an eye on your productivity, without getting in the way of finishing the job.

**SPECIALIZED TOOL SETS**

ORGANIZATION

**KMC18GMTKG**

**General Maintenance Technician's Kit**

- Mobile so that tools may be easily deployed to any jobsite; rain or shine
- Black over red tool control foam ensures an easy way to check for the presence or absence of tools

## ORGANIZATION

# SET BUILDING

## U.S. Sets

### An Unequaled Opportunity

When we introduced our set building program it revolutionized the industry, for the first time there was a planned way to expand tool sets as work and responsibilities evolved and grew. It is designed to provide the most used tools in the most likely progression. As metric tools became the standard in the industry, we began offering a greatly expanded metric selection with a master set that tops anything else available.

Ask your Snap-on® Industrial Account Manager for more information on how you can build exactly the right tool set for your specific needs.

### How the Program Works

If you're building a set from the ground up, start with our **9100GSBO** Apprentice Set. It includes a balanced selection of 1/4", 3/8" and 1/2" square drive tools, wrenches, screwdrivers, pliers, punches and chisels — a basic set for routine maintenance. We've also put increased emphasis on getting you all the metric tools you need, as they are increasingly becoming the standard in many industries.

When your needs grow, the second tool group provides more than 100 additional standard and specialty tools for more advanced work. Each new tool group offers recommendations on the appropriate storage chests and cabinets to help you stay organized and productive. Through this method of steady, planned expansion, you can continue building your tool set until you've achieved the ultimate selection of matched hand tools and storage units.

### U.S. Apprentice Set

#### 9100GSBO Complete Apprentice Set

- Includes **9100GSO** and the **KRA2055FPBO** Top Chest

#### 9100GSO Apprentice Set

VISIBILITY

# VISUAL KEYLESS ENTRY TOOL CONTROL

## LEVEL 5<sup>®</sup> TOOL CONTROL SYSTEM

### SNAP-ON<sup>®</sup> VISUAL CONTROL CABINET

#### NOW YOU CAN CLEARLY SEE WHERE YOUR TOOLS ARE

Features a clear, abrasion-resistant polycarbonate window that gives you a full view of your tools for instant accountability and inventory management. Available in 2 sizes, this cabinet can hold up to 100 tools securely with keyed or keyless entry. With an optional rolling cart or rolling cab, you can position the Visual Control Cabinet close to the work so your technicians always have the right tools ready to use.

**L5V5S49PBO**

Shown with optional foam insert and rolling cart L5V5CRTPBO

#### Colors Available

Red	Gloss Black	Royal Blue	Arctic Silver
PBO	PC	PCM	PKS

### FEATURES AND BENEFITS

#### PERFORMANCE

- Visually manage tools at the “Point of Use”
- Available in 34" and 49" sizes for a tool capacity of 70 to 100 tools
- VCC keeps tools chest high within the “strike zone” – reducing the need to bend and stretch for tools
- Full swing door hinge creates unobstructed entry while gas shocks keep the window in the upright position

#### SECURITY

- Makrolon<sup>®</sup> AR Polycarbonate window the same material used in jet fighter cockpits, for “at a glance” tool management and tool security
- Available with standard key locks or eLock keyless entry for maximum security without the need to distribute keys
- e-Lock is programmable for up to 3,000 users and can be networked with LockView<sup>®</sup> software

#### VERSATILITY

- Includes v-stand brackets with three versatile mounting options:
  1. Mount to a wall using the predrilled, 16" on center holes
  2. Mount to an optional 49" rolling cart using the predrilled holes and included hardware
  3. Mount to any 24" deep or larger roll cab using the predrilled holes and included hardware
- Interior tool control options include metal peg board or customized foam layouts
- Available in 4 color selections so you can organize by area, application or types of tools

## Level 5 LockView® Keyless Entry

# LEVEL5®

TOOL CONTROL SYSTEM

### Level 5 LockView® Keyless Entry

Snap-on's system secures your tool box, allowing you to control who has access to its contents. No keys to lose or share. Administrative access at the unit or through remote software lets you add and delete up to 3,000 authorized users, display an audit trail of past access, and more!

- Grants access to tool boxes with two access methods, Proximity ID card and and/or keypad PIN entry
- Access with single credential or dual credentials
- Battery power makes ideal for environments where tool boxes are on the move
- Powered by 6 D-cell batteries (not included) or power cord – Single set of batteries can last up to six months depending upon environment
- LED lights indicate if box is opened or closed
- At the box programming
- Last access indicator

### L5FPC60SCP Keyless Entry Flammable Liquids

#### Storage Cabinet

- All-welded, 18-gauge, powder-coated steel cabinet provides extra-rigid support for cans and pails
- Double-wall thermal barrier isolates flammable contents from surrounding area
- Dual vents, with built-in steel fire baffles, relieve internal pressure and allow flammable vapor to be piped away
- 2" raised, leak-proof door sill contains leaks and spills
- Keyless entry via badge or keypad, provides maximum security without the need to distribute keys
- LockView® networkable software allows access management from Administrators' PC; manages and monitors access in real time and creates audit trail
- Patented, fail-safe self-closing mechanism automatically closes cabinet after each use or in the event of fire; ensures that doors close tightly from top to bottom
- UL listed; Complies with NFPA Code 30; OSHA Regulations; Uniform Fire Code

### L5KRAPG3 Keyless Entry Retrofit Kit

- Add keyless entry to most KRA/Classic/Heritage roll cabs
- Easy and fast retrofit can be done on-site, on existing boxes
- Each kit includes detailed instructions and box modification templates
- Standard HID proximity card and keypad access

### L5LVSG5 Keyless Entry Software - LockView®

- Allows box to be connected to a laptop via USB cable
- See historical logs for box access
- Manage box user settings, group of users and access rights
- Prevent "jackpot" access by locking out boxes after a number to access attempts

Stock No.	Description
L5LVSG5	Keyless Entry Software - LockView <sup>®</sup>

To order contact your Account Manager or call the Snap-on<sup>®</sup> Industrial Customer Service Center 1-877-740-1901

- Must wear eye protection
- Do not open multiple drawers
- Images may be shown without actual warning labels
- Read safety precautions on pages W1 to W4

**MASTER SERIES KEYLESS ENTRY**

**LEVEL5<sup>®</sup>**  
TOOL CONTROL SYSTEM

**Keyless Entry Features**

- Access by time, user and date
- How long the user was in the box
- Records unauthorized access attempts by date, time and user
- Records the date, time, and user who performed a physical or visual inventory with findings
- Network-ready with your choice of Ethernet or wireless

- Works with your existing badge system or HID
- Connects to other boxes with slave units to create customized workstations
- Intuitive wizard - driven software provides centralized control for all boxes

**Additional Keyless Entry Features:**

**Power**

- 12V rechargeable battery for extended portability
- Battery level (fuel) gauge in LCD screen
- Messages alert users to recharge
- Indicates charging mode: plugged in, fast-charge or standby mode

**Additional Features**

- Programmable auto-relock time
- System upgradeable to 802.11N
- Supports up to 3,000 active users per box
- At the box programming
- Last access indicator

**Multi-Function Buttons**

- Allow programming at the box
- View all settings, make changes
- View audit trails
- Record visual or physical inventories
- Add and delete users easily

**Technical Support**

- Technical Support is provided through your Account Manager

**Networking**

- Networking allows easy system management from a central location LCD Screen
- Show date, time, user name, battery and system status

Level 5 is offered in eight base unit configurations built on Snap-on<sup>®</sup> KRL Roll Cab platforms. Complete specifications and options are detailed in the following pages.

## L5 CONNECT™ SOFTWARE

**L5CONNECT** - Complete software

5 Connect™ software puts you in control of key assets across the facility, designed to enable asset management and compliance, while embracing tool control processes and procedures in your organization.

### Accountability and user productivity

- Control tools and assets across the facility in a single interface
- Track tools that need serialization, calibration, and repair
- Enhance accountability with integrated data analysis tools and audit capabilities
- Quickly assess status across facility in a glance

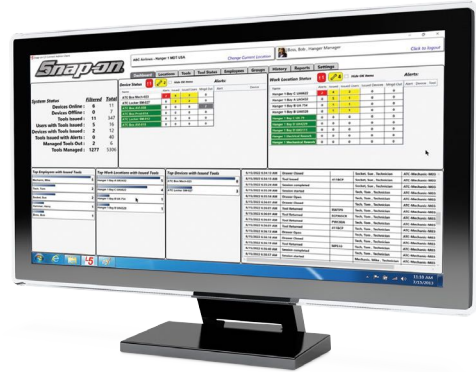

### Customization to match your workflow

- Configure system structures to accommodate your workflow
- Customize built-in reports to suit your needs
- Implement relevant status monitoring and notifications

### Robust security and seamless integration

Leverage upgrades to security enhancements including latest networks security protocol compatibility

- Windows installers for all L5 Connect family software (Service, Admin Client, Smart Device –Toolbox and Locker, True-Crib)
- Robust REST API for versatile integration

**CONTROL TOOLS AND ASSETS**  
across the facility in a single interface.

## Level 5™ True Crib Software

- Software that talks eliminating the need to repeatedly look at the computer screen between barcode scans
- Fastest, most accurate way to check tools in and out
- Software can communicate with the Snap-on® Keyless Entry System for the ultimate in positive tool control
- Provides audible and visual verification of items and function
- Easy to use, smart and secure

## Tool Management Accessories

- The Snap-on Level 5 Tool Control System offers tool management accessories like Scanning Equipment, Signature Pads, Printers and More to accommodate your workflows and tool control processes.

**Signature Pad**  
L5W1128080

**USB Barcode Scanner**

- Images may be shown without actual warning labels
- Read safety precautions on pages W1 to W4

# LEVEL5<sup>®</sup>

TOOL CONTROL SYSTEM

## Customizable, scalable tool control starts with centralized access control.

Tool control systems control tool shrinkage and replacement cost. They also help reduce lost-tool downtime. In critical industries and applications such as aviation and nuclear power, tool control is an essential step toward eliminating FOD (Foreign Object Damage in aviation) and implementing FME (Foreign Material Exclusion in the power industry). Unlocked and open access tool boxes can result in FOD/FME problems. Snap-on<sup>®</sup> puts you in control with three choices. Our Level 5 Keyless Entry system (N031-N035) allows you to specify access to boxes, audit when they are used, and manage it all over a network.

Our Level 5 ATC system provides the simplest and most user-friendly solution for detecting tools issued from and returned to a tool box, providing a critical enhancement to your FOD/FME program. Using advanced digital imaging technology and proprietary software, the tool box automatically keeps track of its inventory by user, and records which tools are removed and replaced, and when.

### Level 5 ATC Advanced technology that makes tracking tools simple.

Level 5 ATC is a true tool control system. Based on the tool list that you supply, each drawer in the tool box is organized and each tool assigned to a unique space in the foam drawer liner. That information is then programmed into the scanning hardware fitted to the top of the box. As each drawer is opened and closed it is scanned digitally, and the image is instantly compared with the baseline stored image of that drawer. Any tool that has been removed or returned is identified and the computer makes an audible announcement: a tool has been removed or replaced.

Additionally, the computer tracks each tool removed and replaced by its part number and by user, and creates an audit trail in database format. Both the digital images and the data entries are stored for review in an audit trail of the last 15,000 transactions. Not only do you get detailed information, but you have access to the actual pictures of the drawer contents for verification.

### Plug and Play vs. Some Assembly Required

Some solutions to FOD and FME problem involve attaching RFID tags, sensors or bar codes to the tools to track them. Additional operations and attachments can create significant additional cost and limitations by:

- Interfering with the normal use of the tool
- Using up additional real estate in the drawers
- Having limited usability on small tools like sockets
- Dislodging and becoming a new source of FOD

### Level 5 ATC Features

- No individual tool scanning required
- No RFID tags to install or replace
- No limitations on tool size—if it fits in the drawer, it works
- Intuitive interface with easy-to-use touchscreen
- Audible voice confirmation of tool removal and replacement
- Automatic locking
- Large 13.3" monitor
- Errors announced and displayed for incorrect tool position or drawer not closed

The Snap-on<sup>®</sup> Level 5 ATC system is delivered with your predetermined set of tools already installed in one of two basic platforms, the **KRL1056** 36" framework, or the **KRL1021** 54" framework. Each is offered several color choices, three different drawer configuration options, with and without casters, and voltage is 110V and 230V European power per system.

To order, work with your Account Manager or Customer Service Center to determine:

- Tool Set Contents
- 36" or 54" platform
- Color choice
- Drawer configuration
- Casters/no casters
- Standard or extended warranty
- Administrative software, with or without remote HID scanner

AUTOMATION

# RECHARGEABLE AUTOMATED TOOL CONTROL

TOOL CONTROL

## LEVEL 5<sup>®</sup> TOOL CONTROL SYSTEM

### An automatic tool control system that's as mobile as the work you do.

It's no secret that the Snap-on<sup>®</sup> Level 5 Automated Tool Control System is the most comprehensive program of its kind in the industry. Using advanced digital imaging technology and proprietary software, ATC automatically keeps track of its inventory by user and records which tools are removed and replaced—all in real time. And now, you can take this revolutionary system where you need it, thanks to the on-board rechargeable batteries. Moving ATC closer to the action improves productivity, saving time and money.

### Rechargeable Batteries

Both 36-inch and 54-inch ATC platforms include 6 rechargeable, interchangeable batteries, providing up to 16 hours of battery life (two 8-hour shifts). The hot-swappable feature allows workers to easily replace an existing battery with a charged battery without impacting productivity.

### Recharge Options

Batteries can be fully recharged in 3.5 hours using the internal charging system by plugging in the ATC. An optional, stand-alone battery charger is available which charges up to 6 batteries in 4 hours. Extra batteries are available individually or in a set of 6.

### Safety and Protection

Snap-on<sup>®</sup> rechargeable batteries feature state-of-the-art circuit protection that prevents overload. For safety, the batteries will shutdown if they reach an upper heat limit, (well below critical stages) or if there is an accidental shortage.

### Battery Monitoring

The ATC system monitors the batteries so you don't have to. A visual indicator shows discharge levels and the system verbally announces low battery levels. When batteries are critically low, the ATC system safely shuts down the system and all components.

### Battery Tracking

Each battery is recorded in the ATC system by a serial number and is tracked like a tool. The ATC system records an event each time a battery is removed or replaced.

- Must wear eye protection
- Do not open multiple drawers
- Images may be shown without actual warning labels
- Read safety precautions on pages W1 to W4

# Selection Guide

## How to Order

The Snap-on® Level 5 ATC system is delivered with your predetermined set of tools already installed in one of two basic platforms, 36" or 54". Each is offered in various color choices, three different drawer configuration options, with and without casters, and voltage is 110V and 230V European power per system. To order, work with your Snap-on® Industrial Account Manager or Customer Service Center to determine:

- Step 1** Tool Set Contents—pick the tools you need and we will lay out the drawer arrangements
- Step 2** 36" or 54" Platform—we'll help you pick the right platform based on the number of tools in your set
- Step 3** Select color from chart. Add suffix to base stock no.
- Step 4** Drawer Configuration—pick one of three
- Step 5** Casters—with or without, depending on mobility requirements
- Step 6** Warranty—standard or extended
- Step 7** Order Administrative Software, with Remote HID Scanner

Configuration	36"			54"		
# of Drawers	6	7	8	6	7	8
With Casters Base Stock #	L5AA363	L5AA362	L5AA361	L5AA543	L5AA542	L5AA541
Without Casters Base Stock #	L5AA3S3	L5AA3S2	L5AA3S1	L5AA5S3	L5AA5S2	L5AA5S1

**Color Options**

Red BO	Gloss Black PC	Royal Blue CM	Ultra Yellow ES	Arctic Silver KS	Candy Apple Red JH	Extreme Green JJ	Electric Orange JK

## Software

Administrative software with employee badge scanner.

## Features and Specifications

- 1 year electronics warranty
- Extended warranty available
- 110V/230V AC power required
- Unlimited number of assigned users
- Networking through Ethernet or wireless
- 1 copy of ATC software required for each administrator

## Accessories

- KACL536PC** Cover for 36" Standard ATC
- KACL554PC** Cover for 54" Standard ATC
- KACL536RCPC** Cover for 36" Rechargeable ATC
- KACL554RCPC** Cover for 54" Rechargeable ATC
- L5A0298J21B** Battery Charger
- L5A0298J20A** 6 Pack Batteries
- L5A0298J19A** Individual Batteries

## Protect Your Investment with a Snap-on® Extended Warranty

Snap-on® offers one, two and three year Extended Warranties that will help keep your system fully mission capable, and includes services such as software updates, extra foam cutting and annual inspections

## Platform Available

- 36" single bank roll cab, approximate capacity 450 tools
- 54" single bank roll cab, approximate capacity 750 tools

## Selection Guide

### Create Your Ideal System

The Snap-on® Level 5 Rechargeable ATC system is delivered with your predetermined set of tools already installed in one of two basic platforms, 36" or 54". Each is offered in up to four different drawer configurations and various color choices.

Configuration	36"				54"			
# of Drawers	6	7	8	9	6	7	8	9
Drawer Layout								
Base Stock No.	L5ARC363	L5ARC362	L5ARC361	L5ARC360	L5ARC543	L5ARC542	L5ARC541	L5ARC540

**Color Options**

Red	Gloss Black	Royal Blue	Ultra Yellow	Arctic Silver
BO	PC	CM	ES	KS

Select color from chart. Add suffix to Base Stock No.

Note: 9 drawer configuration is only available in Red and Royal Blue

### ATC Portal

Provides a secure, accurate, and flexible self-service inventory tracking experience.

A turnkey system of radio frequency identification (RFID) readers placed at a choke point, to track movement of RFID tags in and out of a controlled area for inventory management.

L5ATCPORTAL

- Must wear eye protection
- Read safety precautions on pages W1 to W4

# TOOL MANAGEMENT

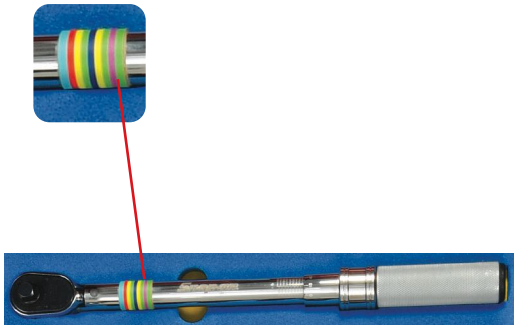

## Take ATC to the Next Level

Track Specific “Serialized, Certified and Calibrated” Assets such as torque wrenches, calipers & gauges with the ATC ZoomID Detection System. Tags are read/scanned and recorded by the ATC Box cameras like a barcode. Each adhesive tag has a unique color and number sequence. (65,000 unique tag codes available). Plus, get an immediate visual of your tool control status with the FastFlag Status Display Lights System. This add-on works with your existing ATC software to give you feedback in real time.

## ZoomID - Automated Tool Detection System for ATC

### Color Barcoded Tags

- Tags adhere directly to the tool, without interfering with the tools fit or function
- Uses current ATC Gen4 hardware and L5 CONNECT software platform
- 65,000 unique tag codes available

- Yellow Light - Box unlocked, tools issued
- Green Light - All tools present, no alerts, box locked
- Kit includes light, mounting hardware and installation manual

# LEVEL5<sup>®</sup>

TOOL CONTROL SYSTEM

## Level 5 ATC Locker

Automated Asset Management at the Speed of Work

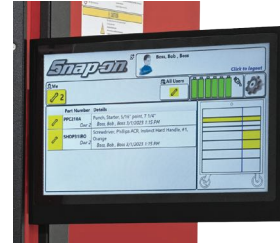

- Fully networkable and scalable with other Level 5™ ATC units; customizable reporting options
- Advanced RFID technology and proprietary software issues and records returns of Critical Industry workplace assets in real-time
- Track irregularly shaped items like extension cords, tools kitted in plastic or fabric carrying cases, personal protective equipment and more

- Heavy-duty metal shelves with foam bear the weight of larger tools and assets
- Track serialized items like torque wrenches, multimeters, micrometers, etc.
- Onboard current allows for secure recharging and storage of power tools
- Connects to Level 5™ administrative interface with same look/feel of operation

## ATC Locker Ordering and Install Process

1. Select Locker by Color and Location (NA/North America/US L5331J00CXXX, EU/Europe L5331J02CXXX)
2. Order Admin Software, One per Location includes card scanner. Contact Your Account Manager for Part Numbers and Pricing
  - If the customer already owns ATC boxes they DO NOT need to order new software, just update
3. Order RFID Starter Kit by Location (Domestic or International)
  - L5A0331J62B Domestic or L5A0331J63A International
  - Includes a variety of tags, adhesive and shrink tube
4. Optional (Highly Recommended)-RFID tag Reader L5A0331J20A
  - Installer will have one for initial install, customer will need one for future tag additions or tag replacements
5. ATC Install Techs will do initial set up of locker and item tagging

- Must wear eye protection
- Read safety precautions on pages W1 to W4

**PORTABLE TOOL STORAGE**

**Mobile Tool Case with Drawers**

**ECNAISNAPON**

- Configurable drawer layout with three interchangeable drawer sizes – 1", 2" or 3" (sold separately)
- Assortment boxes included hidden under removable top compartment tray
- Sealed waterproof design, with a pressure relief valve to regulate internal pressure during altitude changes
- Stackable design with two side handles and top handle for easy and safe lifting
- Includes rear wheels and telescoping handle for portability (optional pivoting 4-wheel adapter kit available separately)
- Drawers include positive stops to prevent inadvertent removal
- Keyed locking system with three padlock points for added security
- Weighs 33 lbs. empty, with 100 lb. maximum capacity; black

**Mobile Tool Case Accessories**

- Positive stops to prevent inadvertent drawer removal
- Made of strong and durable copolymer polypropylene

**ECNAIDRAW3.E 1" Drawer**

- 19.3" w x 12.1" d x 1.1" h

**ECNAIDRAW9.E 3" Drawer**

- 19.3" w x 12.1" d x 3.74" h

**ECNAIWHEELS Mobile Wheel Kit**

- Four pivoting wheels; 2 brakes

**ECNWL01 Plastic Assortment Box 6 Compartments**

- Clear plastic with 6 individually divided compartments
- 6-1/2" L x 4-5/8" W x 1-1/8" D

**ECNWL02 Plastic Assortment Box 13 Compartments**

- 6-1/2" L x 4-5/8" W x 1-1/8" D

**ECNWL04 Plastic Assortment Box 10 Compartments**

- 9-5/8" L x 5" W x 1-1/8" D

**ECNROCKSNAP**

**Mobile Tool Case**

**ECNROCKSNAP**

- Made of High Density Polyethylene, for strength and durability
- Provided with two tool pallets with elasticated loops, with bulk storage space below each pallet.
- Telescoping handle and 3-3/4" polymer wheels for ease of portability
- Includes two TSA keyed locks
- Includes rear wheels and a telescoping handle for portability
- Document holder and two small assortment boxes included
- Keyed locking system
- 33 lbs. empty, with a 100 lb. load capacity
- Exterior Dimensions 22-7/8" W x 17-15/16" H x 15" D

**3-Drawer Blow Molded Portable Chest**

**KRP183**

- They are made of durable, blow-molded polymer with a spacious top compartment to store larger items, plus three steel drawers to organize tools
- Drawers open and close smoothly on heavy-duty steel drawer glides
- Security features include drawers that lock when the lid is closed
- 13.9 lbs; 23" L x 10" W x 13.5" H
- Top compartment 22" L x 8.5" W x 5" H;
- Drawers 18" L x 7.5" W x 1.75" D

# PORTABLE TOOL STORAGE

TOOL CONTROL

## All Weather Mobile Tool Chest

Stackable for easy transport, even when fully loaded. Its wider wheelbase and telescoping handle makes for more stable and easier transport. Secure latching allows for better security, yet it is easy to use. Accommodates up to 8 drawers, in 2 different sizes, for the greatest flexibility of tool storage. And of course, nothing can protect your tools better from the elements.

### Fully Enclosed Ball Bearing Wheels on Wide Corners

- 22" wheelbase improves stability during transport
- Can open the lid without flipping the box over on its side
- Simple, fast field repair capability reduces downtime
- Solid rubber wheels absorb the shock of rough surfaces

### Four Bar Latches

- Prevents accidental opening
- Can be released with one hand
- Superior to swing latch offered on competitive cases

### Telescoping Trolley Handle

- Comfortable for people between the 5th and 95th percentile height

### Cover Swings Open on Top and Can Be Used As a Seat

- Made possible by durable butterfly hinges with stainless steel hardware
- Passivated stainless steel resists corrosion in harsh environments

### Drawers Fully Extend on Snap-on®'s Proprietary Composite Slides, and Rails

- Loaded drawers extend fully so the entire contents of the drawer may be easily viewed
- Three drawer sizes 1-1/4", 2-3/4" and 3"

### Meets/Exceeds Applicable Standards

- MIL 810 Environmental Resistance and Performance
- MIL 1916 Quality Standard Service Parts Available

## All Weather Open Top Mobile Tool Chest

The same great features as the All Weather Tool Chest but with a Open Top Compartment with Storage Space of 21.2 W x 15.4 H x 3.2 D when lid is closed

## All-Weather Tool Chest Safety Sling

### WFXTHSSAWTC

- Specially designed to safely hoist the Snap-on® KMC18 series of all-weather tool chests (Approved for use with the KMC18 series only)
- Made by Wear-Flex, the acknowledged leader in the field of synthetic slings for over 40 years
- Heat imprinted sewn-on bad that includes the rated capacity and sling serial number for easy identification to satisfy inspection records
- 500 lb. weight limit
- Includes attached use and care instructions

- Must wear eye protection
- Read safety precautions on pages W1 to W4

# TOOL STORAGE SYSTEM

## One Drawer at a Time

### Safety At Your Fingertips

Snap-on® Drawer Control is an interlocking mechanism that prevents you from opening more than one drawer at a time in each drawer bank. This valuable safety feature helps prevent fully loaded roll cabs from tipping over.

**Drawer Control is available for all Snap-on® Masters Series products. Call your Snap-on® Industrial sales representative for additional information.**

### How It Works

What makes Drawer Control work? A special interlocking mechanism connects all drawer slides within a given drawer bank. When one drawer is opened the interlocking shaft locks all the other drawer slides in the drawer bank, preventing them from opening. When all drawers are closed, the special interlocking mechanism releases all the drawer slides, allowing you to open any single drawer in the drawer bank. Smart AND safe.

### Easy To Order.

STANDARD UNITS with One-Drawer-at-a-Time Feature

Other boxes and colors available through Industrial Customer Service Center

You can order this feature on all new Snap-on® Masters series roll cabs and top chests. To order Drawer Control, simply contact our Industrial Customer Service Center (ICSC).

When all drawers are closed the special interlocking mechanism releases the drawer slides, allowing you to open any single drawer in the drawer bank.

Taller drawers are available. Call your Snap-on® Industrial Account Manager for assistance.  
Drawer Capacity: 400-lbs UDL @ 100% extension

**Safe, Strong & Efficient Drawer Design**

**Riveted Drawer Fronts & Handles**

- Stainless steel rivets provide 650 lbs. of shear strength per rivet for outstanding durability. A minimum of 4 rivets are used to fasten the drawer front to the body and the drawer pull to the drawer front, creating a stronger bond than screws can

**Full-Width Aluminum Handles with Safety Overlap and 45° Angle**

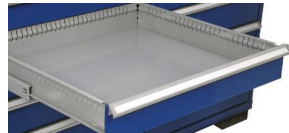

- Overlap helps prevent injury by eliminating sharp edges and pinch points
- Angled design allows improved handle label visibility

**100% View Drawer Extension**

- Full visibility and access to drawer contents via double roller tracks
- Six high-quality steel ball bearings and 4 roller bearings support 400 lbs. per drawer

**Safe Overlapping Handle**

**Supports Up To 400 LBS.  
Per Drawer**

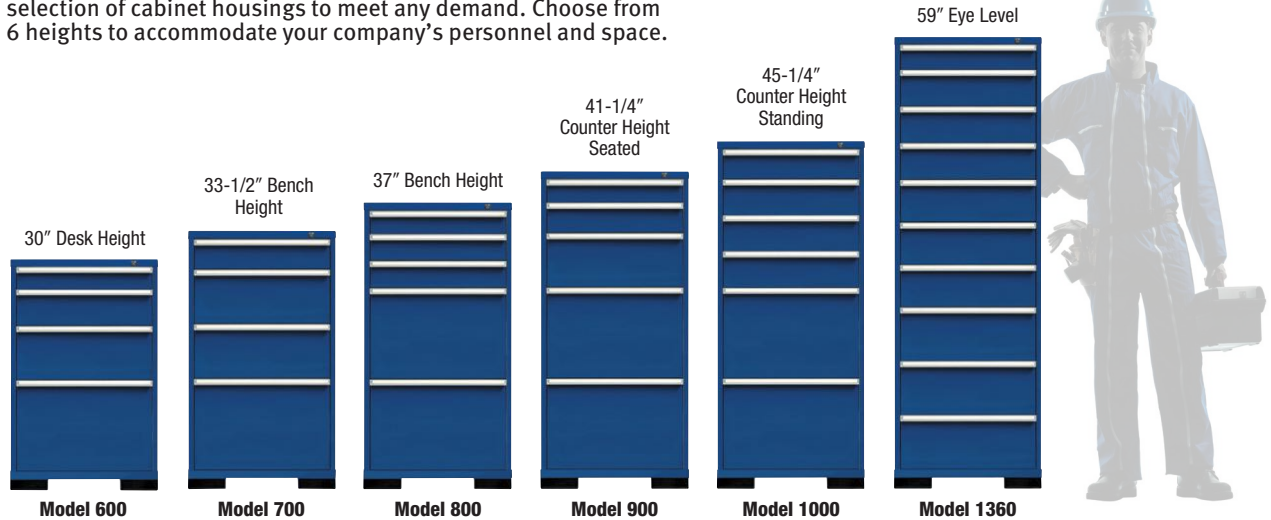

• Must wear eye protection  
• Read safety precautions on pages W1 to W4

**Cabinet Heights & Width Options**

**Choose from Six Cabinet Heights**

The Williams® Modular Industrial Storage Program features a large selection of cabinet housings to meet any demand. Choose from 6 heights to accommodate your company's personnel and space.

**Choose 5 Five Cabinet Widths**

Cabinets are available in five different widths. Choose widths to accommodate your specific storage needs. All cabinets are 27-3/4" deep and are available in all cabinet heights.

**Narrow-Wide (NW)**

**23" Wide Cabinets**

- Makes excellent work station pedestals or mobile cabinets where space is limited
- Accommodates 18" items

**Standard-Wide (SW)**

**29-1/4" Wide Cabinets**

- Recommended for most applications and provides the fastest pick-rates
- Accommodates items up to 24-1/2"

**Standard-Wide Plus (SWP)**

**32-1/2" Wide Cabinets**

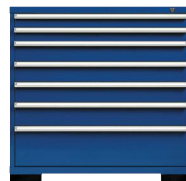

- Recommended for most applications and provides the fastest pick-rates
- Accommodates 28" items

**Extra-Wide Plus (EWP)**

**46" Wide Cabinets**

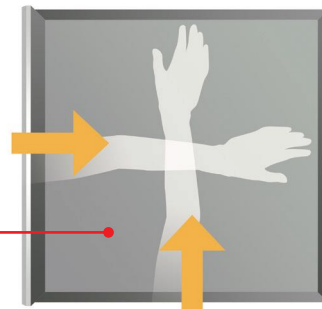

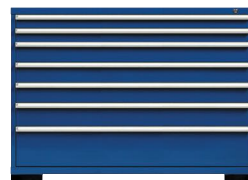

- Recommended where parts or tools exceed 39"
- Accommodates 42" items

**Double-Wide (DW)**

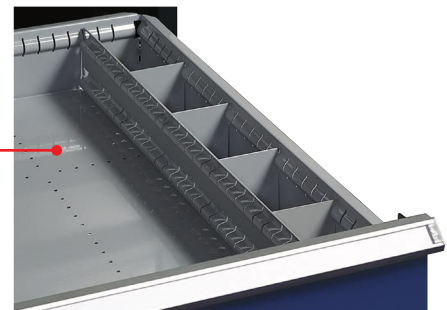

**58-1/4" Wide Cabinets**

- Recommended for extra-long items
- Accommodates items up to 53-1/2" wide

**Human-Engineered Drawers – Square Design**

- The square **Standard Wide (SW) drawer** was ergonomically designed to accommodate the reach of the average person from either the front or the side, increasing picking productivity. Picking stock or retrieving parts from the side keeps aisles clear for increased efficiency and productivity.

**More Storage Space**

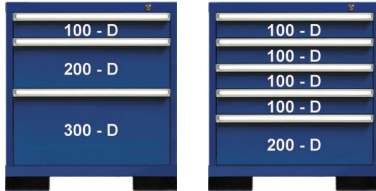

The innovative **Standard Wide Plus (SWP)** cabinet is an exclusive, providing up to 22% more storage than our SW (standard wide) cabinets or competitors' products.

Layout No. 3

Layout No. 5

Layout No. 9

### Standard Drawer Layouts

- Most popular drawer layouts shown
- Custom drawer layouts available

#### Layout No. 1

- 16 compartments
- 3 slotted partitions - 12 divider plates 8U

#### Layout No. 3

- 20 compartments
- 3 slotted partitions - 16 divider plates 8U

#### Layout No. 5

- 12 compartments
- 2 slotted partitions - 6 divider plates 10U
- 3 divider plates 12U

#### Layout No. 9

- 36 compartments
- 5 slotted partitions - 20 divider plates 5U
- 10 divider plates 6U

## Options for Even Greater Security and Safety

### Hinged Lock Bar

- Features a padlock hasp for additional protection and security of drawers and contents

### Lock In/Lock Out Latch

- Locks individual drawers into position, either closed or fully extended
- Recommended for truck and van storage applications

• Must wear eye protection  
• Read safety precautions on pages W1 to W4

**More Ways To Customize, Organize, Optimize**

**Shelving Units**

Organize bulky items by adding shelving storage to your cabinets. Their rugged, all-welded construction assures smooth operation, durability and years of dependable heavy-duty service. And because they're adjustable, you can rearrange the shelves to flexibly adapt to your storage needs for years to come.

- **18-gauge shelf** notched to fit snugly around upright posts, preventing small items from falling through any gaps to the shelf below.
- **Powder-coat epoxy paint** baked on to provide a high gloss finish.
- **Shelf reinforcement** adds an additional 400 lbs. of load capacity.
- **Patented 11-gauge shelf support** frames the system and supports heavy loads.
- **Clear Vue doors** (optional) made from plexiglass keep your equipment in sight and secure.

**Choose From Various Sizes**

Shelving units are available in different widths, depths and heights to meet your specific storage needs.

**Widths:** Narrow-Wide (NW) – 23-1/4"  
 Standard-Wide (SW) – 29-1/4"  
 Standard-Wide Plus (SWP) – 32-1/2"

**Depths:** Shallow-Depth (SD) – 23-1/2"  
 Standard-Depth (S) – 27-3/4"

**Heights:** 78" and 84"

**Choose Options and Accessories**

Select between shelves and drawers, or a combination of the two, for the interior. You can also further customize the shelving unit with solid doors, Clear Vue doors, a fork lift base and extra shelves. Available in standard colors of Dark Blue (DB), Red (RD), and Black (BK).

**Workstations**

Every workplace needs a place to work. We deliver highly customizable workstations to fit your specific needs. They can be stationary or mobile, can have shelves, cabinets, or risers, and can be topped with a variety of work surfaces. You can even add footrests. With this much customization, you'll be able to get the job done...your way.

**Tops**

- Solid maple work surfaces are available in a variety of shapes and sizes
- Stainless tops also available upon request

Stock No.	Description

VISIBILITY

# LASER ENGRAVERS

TOOL CONTROL

LASV10W

## Laser Engravers

The LASV10W and LASV20W Systems are the latest in cutting-edge fiber laser technology for industrial laser marking/ID/traceability applications. The characteristic of this laser system is the excellent beam quality necessary for marking/engraving a broad range of materials. This system requires no chemicals during use, simplifying operations, and eliminating the need for potentially hazardous materials and special handling. No MSDS is necessary.

- Best results on any metal: steel, titanium, aluminum (bare, anodized or coated), as well as plastics (such as ABS, Lexan, PES, PET, PVC), polycarbonate and more.
- Applications include tools, automotive, aerospace, medical device, electronics, semiconductor, corporate jewelry awards, firearms manufacturing, and many more.

Stock No.	Description

LASRING.DIV	STEPPER MOTOR DRIVEN ROTARY DE
LASV10W-PD	PNEUMATIC DOOR LASV10W/20W
LASV10W-TRN	On-Site TRAINING AND INSTALLATION CONUS 10W/20W

Laser Engraver package includes: LASER, MOBILE BASE, FUME EXTRACTOR, POWER CONDITIONER, VIRTUAL SET UP, Shipped to CONUS address.

All units work on both 110 and 230 Volts, 50/60 Hz • Snap-on® Industrial follows a policy of continuous product improvement.

- Specifications are subject to change without notice.
- LASV10W is a class 4 laser source. Laser interaction with organic or inorganic material can cause TOXIC FUMES and PARTICLES.
- The operator shall provide interlocks, indicators and other appropriate safety features, in full compliance with 21 CFR 1040 and/or other applicable national and local regulations.

- Must wear eye protection
- Read safety precautions on pages W1 to W4

# PORTABLE TOOL STORAGE

## Micro Cases

Great for rugged activities - not for swimming or submerging.

- Easy open latch, includes carabiner
- Stainless steel hardware with rubber liner that doubles as O-ring seal
- Water resistant, crushproof, and dust proof
- Automatic Pressure Equalization Valve balances interior pressure, keeps water out
